COS40005

Computing Technology Project A

Semester September 2026

Please read this Unit Outline carefully. It includes:

- PART A** Unit summary
- PART B** Your Unit in more detail
- PART C** Further information

PART A: Unit Summary

Unit Code(s)	COS40005
Unit Title	Computing Technology Project A
Duration	1 Semester
Total Contact Hours	24 hours [(1-hr Seminar X 12 Weeks), (1-hour meeting X 12 Weeks)]
Requisites:	
Pre-requisites	175 Credit Points
Co-requisites	Nil
Concurrent pre-requisites	Nil
Anti-requisites	SWE40001 Software Engineering Project A
Assumed knowledge	Advanced Computer Programming (e.g., COS20007), AND IT Project Management (e.g., COS20031)
Credit Points	12.5
Campus/Location	Swinburne Vietnam
Mode of Delivery	Online seminar and supervisory meeting.
Assessment Summary	Team Submissions (Team & Project Plan, Sprint Reports, Video Presentation) Individual Submissions (Contribution Summary, Peer Review and Research Report)

Aims

This is a project-based unit in which students work individually, or in teams if the project is a large industry project, to provide students with the skills to generate a computing technology solution to solve one or more industry challenges specifically designed and oriented towards computing technologies. Having an overall focus on computing technology innovation, students will be focusing on the research and development stages of a year-long project, this being the first part. Students will be able to select a project from a range of industry-oriented projects aligned to their chosen computing major. Teams of students will have a staff member as a ‘facilitator’ to guide their learning whilst working on their projects.

Unit Learning Outcomes

Students who successfully complete this unit can:

1. Create a real-world computing technology project by applying professional ethical practices as an IT practitioner and by incorporating relevant methods, techniques, tools, processes, and standards
2. Evaluate topic areas by applying research methods and skills to complete a research report
3. Create project and handover strategies that align with ethical standards and meet information security requirements
4. Create structured approaches to planning, execution, monitoring, and delivery of a computing technology project, incorporating principles and best practices in requirements engineering, architectural engineering, risk engineering (management), quality engineering and change engineering (management)

5. Communicate and work effectively within teams and with diverse stakeholders by demonstrating appropriate use of verbal, written, and digital communication strategies tailored to professional and project-specific contexts

Graduate Attributes

The Swinburne Graduate Attributes describe the capability of our graduates to use knowledge, skills and behaviours to contribute to society meaningfully and positively. They include professional, self-directed learning and future-ready skills.

This unit contributes to the development of the following Swinburne Graduate Attributes:

- GA3 Teamwork - Collaboration and negotiation
- GA4 Teamwork – Teamwork roles and processes

Other graduate attributes may be practised in the unit but are not formally taught as part of the unit content, nor incorporated within formal assessment.

Content

- Project Management in computing technology projects
- Risk Analysis and Management in computing technology projects
- Professional Ethics in computing technology
- Research Methods in computing technology
- Literature Review in computing technologies related to the project and student's major
- System Development processes, methods, techniques, tools and standards
- Technical Skills relevant to student's major
- Communication Skills in dealing with clients, colleagues and other stakeholders

PART B: Your Unit in more detail

Unit Improvements

Feedback provided by previous students through the Student Survey has resulted in improvements that have been made to this unit. Recent improvements include:

- Replacing weekly worklogs with sprint contribution summary

Unit Teaching Staff

Name	Role	Room	Email / Teams	Consultation Times
Dr Minh Duc Le	Unit Convenor	Hanoi	dle1@swin.edu.au	By appointment
Dr Van Dai Pham	Supervisor	Hanoi	dvpham@swin.edu.au	By appointment
Dr Le Phan Gia Bao	Supervisor	Hanoi	bple@swin.edu.au	By appointment
Khanh Dang	Supervisor	HCMC	ktdang@swin.edu.au	By appointment
Dr Sam Nguyen	Supervisor	HCMC	sxnguyen@swin.edu.au	By appointment
Anatar Kar	Supervisor	Danang	akar@swin.edu.au	By appointment

Learning and Teaching Structure

Category	Activity	Total Hours	Hours per Week	Teaching Period Weeks
Online	Seminar	12 hours	1 hours	Weeks 1 to 12
In person/Online	Supervisor Meeting	12 hours	1 hour	Weeks 1 to 12
In person/Online	Team Meeting	12 hours	1 hours	Weeks 1 to 12

Week by Week Schedule

Week	Week Beginning	Teaching and Learning Activity	Student Task or Assessment
1	14 Sep	Preparation Phase • Find a project • Start teamwork • Meet the client • Research the project • Prepare plan	Team Submission: Team & Project Plan Report Individual Submission: Contribution Summary and Research Report.
2	21 Sep		
3	28 Sep		
4	5 Oct		
5	12 Oct		
6	19 Oct		
7	26 Oct	Sprint 1 - Sprint plan - Sprint work - Sprint review - Sprint retrospect	Team Submission: Sprint Report Individual Submission: Contribution Summary
8	2 Nov		
9	9 Nov		
10	16 Nov	Sprint 2 - Sprint plan - Sprint work - Sprint review	Team Submission: Sprint Report Team Submission: Contribution Summary
11	23 Nov		
12	30 Nov		

		- Sprint retrospect	
12	(continued)		Team Submission: Video Presentation Individual Submission: Peer review

Assessment

a) Assessment overview

Tasks and Details	Individual or Group	Weighting	Mapped Unit Learning Outcomes	Mapped Graduate Attributes	Assessment Due Date	Auto 3-day extension available (Y/N)
1. Contribution Summary	Individual	40%	All	All	End of Weeks 6, 9, 12	Y
2. Research Report	Individual	10%	All	2	End of Week 4	Y
3. Team & Project Plan	Group	15%	All	3,4	End of Week 6	N
4. Sprint Reports	Group	30%	All	3, 4	End of Weeks 9, 12	N
5. Video Presentation	Group	5%	All	1,2	End of Week 13	N
6. Peer Review	Group	0%	All		End of Week 13	N

Assessment Requirements	Details
b) Use of generative AI (genAI) in this unit	Permitted use of genAI varies by assessment task in this unit. Refer to each assessment description below for specific guidance. Use of Artificial Intelligence (AI) Students may use AI tools to support their learning and development throughout the project. Before using AI tools for any project-related work, <i>students must discuss the intended use with their supervisor and client to ensure that AI assistance is appropriate, transparent, and aligned with project requirements.</i> Acceptable uses include: Requirements Engineering (RE) Tasks: - Brainstorming ideas and refining project requirements. - Identifying stakeholders, user stories, use cases, and acceptance criteria. - Exploring domain knowledge and industry best practices. - Reviewing and improving requirement documentation. Programming Tasks: - Understanding programming concepts and APIs. - Explaining code, debugging errors, and identifying possible solutions. - Learning new libraries, frameworks, or programming techniques.

	• Generating example code snippets for learning purposes only (the code cannot be used in the project work without modification, validation, and integration by the student). Testing Tasks: • Generating ideas for test cases and edge cases. • Understanding testing strategies and testing frameworks. • Assisting with unit, integration, and system testing approaches. • Helping interpret test results and debugging failures. Academic Integrity Requirements • AI-generated content must not be copied and submitted directly as your own work. • All submitted work must demonstrate your own understanding, analysis, design decisions, coding, and testing. • Students are expected to critically evaluate, modify, validate, and integrate any AI-assisted output before using it. • Students must be able to explain and justify any AI-assisted work, including requirements decisions, design choices, code implementation, testing approaches, and documentation, during project demonstrations, interviews, or other verification activities. • Students must maintain evidence of their own work and development process (e.g., Git commits, issue tracker records, design documents, sprint reports, drafts, or other project artefacts). This evidence may be used to verify individual contributions. • Students remain fully responsible for the accuracy, quality, security, and originality of all submitted work, regardless of whether AI was used. • Any errors, vulnerabilities, inappropriate design decisions, or inaccuracies introduced through AI-assisted work remain the responsibility of the student. • The teaching team may conduct interviews, code walkthroughs, demonstrations, or other verification activities to assess students' understanding and confirm individual contributions. Marks may be adjusted where the evidence provided is inconsistent with the submitted work or does not demonstrate the student's individual understanding and contribution. AI Declaration If AI tools are used at any stage of the project, students must submit an AI Usage Log with their assessment. The log should include: • The AI tool used (e.g., ChatGPT, GitHub Copilot, Gemini). • The date of use.
--	---

	• The purpose of using the AI tool. • The prompts or questions and/or information provided to the AI. • A brief description of how the AI output was used, modified, or verified. • Confirmation that the final submitted work reflects the student's own understanding and has not been copied directly from AI-generated content. Failure to declare AI assistance, inability to demonstrate understanding of AI-assisted work, or submitting AI-generated content without appropriate attribution may be considered a breach of academic integrity policies.
c) Hurdle requirements	To pass this unit, you must: - achieve an overall mark for the unit of 50% or more, and - complete the project to an acceptable standard. A rubric will be used to determine if students have met the acceptable standard. The rubric is available on Canvas. Students who do not successfully achieve hurdle requirement (ii), will receive a maximum of 45% as the total mark for the unit.
d) Final assessment period	There is no final examination for this unit. However, some group submissions are scheduled during the examination period.
e) Submission requirements	Assignments and other assessments are generally submitted online through the Canvas assessment submission system which integrates with the Turnitin. Please ensure you keep a copy of all assessments that are submitted.
f) Extensions, late penalties and special consideration	<u>Extensions</u> If you need an extension you may apply for an automatic 3 day extension to the due date. Provided the assessment due date has not passed, you can use the EzExtend tool to apply for an extension, which is available on the left side of Canvas under "Assignment Extensions". EzExtend lists assessment tasks 14 days before the due date. If you need an extension longer than 3 days, your assignment is already overdue, or you are experiencing exceptional circumstances, please consider applying for Special Consideration. Please note that EzExtend cannot be used to request individual extensions for time limited (e.g. exams, tests), synchronous performance or practice-based assessments requiring validation, synchronous oral assessments or group assessments.

	Assessment tasks that utilise tools outside of the LMS may require requests for extensions via the Special Consideration process. <u>Late Penalties</u> Unless an extension has been approved, late submissions will result in a mark penalty. You will be penalised 5% of the available mark for each calendar day the task is late, up to a maximum of seven calendar days. After seven calendar days, a zero mark will be recorded. For example: - if you achieve 90/100 on an assessment task but the task was submitted two days late, a late penalty of 10 is applied, and your mark is recorded as 80/100. - if you achieve 29/35 on an assessment but the task was submitted five days late, a late penalty of 8.75 (25% of the 35 available marks) is applied, and your mark is recorded as 20.25/35. <u>Special Consideration</u> If your studies have been adversely affected by serious and unavoidable circumstances outside of your control (e.g. severe illness or unavoidable obligation), you can apply for special consideration. Applications for Special Consideration are made via an online form <u>no later than 5.00pm</u> of the third working day after the assessment due date. For further information about eligibility and how to apply, see https://www.swinburne.edu.au/life-at-swinburne/student-support-services/special-consideration-assistance/
g) Referencing	To avoid breaching academic integrity, you are required to provide references whenever you include information from other sources in your work and acknowledge when you have used Artificial Intelligence (AI) tools (such as Microsoft Copilot). Further details regarding academic integrity are available in Section C of this document. Referencing conventions required for this unit are: IEEE citation style (https://pitt.libguides.com/citationhelp/ieee) Helpful information on referencing can be found at http://www.swinburne.edu.au/library/referencing/
h) Groupwork guidelines	A group assignment is the collective responsibility of the entire group, and if one member is temporarily unable to contribute, the group should be able to reallocate responsibilities to keep to schedule. In the event of longer-term illness or other serious problems involving a member of group, it is the responsibility of the other members to notify immediately the Unit Convenor or relevant tutor.

	Group submissions must be submitted with an Assignment Cover Sheet, signed by all members of the group. All group members must be satisfied that the work has been correctly submitted. Any penalties for late submission will generally apply to all group members, not just the person who submitted.
--	---

b) Final unit results

a) Supplementary assessment	Supplementary assessment is not available in this unit because it does not meet the requirements of the external accrediting body.
------------------------------------	--

Required Textbook(s)

There is no textbook for this unit.

Recommended Reading Materials

Swinburne Library has a large collection of resources. Listed below are some references that will provide valuable supplementary information to this unit. It is also recommended that you explore other sources to broaden your understanding.

SCHWABER, K. & BEEDLE, M. 2002. Agile software development with Scrum, Upper Saddle River, NJ, Prentice Hall.

PART C: FURTHER INFORMATION

For further information on any of these topics, refer to Swinburne's Student webpage <http://www.swinburne.edu.au/student/>

Student behaviour and wellbeing

All students are expected to: act with integrity, honesty and fairness; be inclusive, ethical and respectful of others; and appropriately use University resources, information, equipment and facilities. All students are expected to contribute to creating a work and study environment that is safe and free from bullying, violence, discrimination, sexual harassment, vilification and other forms of unacceptable behaviour.

The [Student Charter](#) describes what students can reasonably expect from Swinburne in order to enjoy a quality learning experience. The Charter also sets out what is expected of students with regards to your studies and the way you conduct yourself towards other people and property.

You are expected to familiarise yourself with University regulations and policies and are obliged to abide by these, including the [Student Academic Misconduct Regulations](#), [Student General Misconduct Regulations](#) and the [People, Culture and Integrity Policy](#). Any student found to be in breach of these may be subject to disciplinary processes.

Examples of expected behaviours are:

- conducting yourself in teaching areas in a manner that is professional and not disruptive to others
- following specific safety procedures in Swinburne laboratories, such as wearing appropriate footwear and safety equipment, not acting in a manner which is dangerous or disruptive (e.g. playing computer games), and not bringing in food or drink
- following emergency and evacuation procedures and following instructions given by staff/wardens in an emergency response.

Canvas

You should regularly log on to the Swinburne learning management system, Canvas. You can access Canvas via the [Student login](#) webpage or <https://swinburne.instructure.com/> Canvas is updated regularly with important unit information and communications.

Communication

All communication will be via your Swinburne email address. If you access your email through a provider other than Swinburne, then it is your responsibility to ensure that your Swinburne email is redirected to your private email address.

Academic Integrity

Academic integrity is about taking responsibility for your learning and submitting work that is honestly your own. It means acknowledging the ideas, contributions and work of others; referencing your sources and acknowledging the use of generative artificial intelligence; contributing fairly to group work; and completing tasks, tests and exams without cheating. Artificial intelligence tools should only be used where approved by the Unit Convenor.

Swinburne University uses the Turnitin system, which helps to identify inadequate citations, poor paraphrasing and unoriginal work in assignments that are submitted via Canvas. Your Unit Convenor will provide further details.

Plagiarism, collusion, contract cheating, unauthorised file sharing, falsification, fabrication, manipulation or misrepresentation of information, reuse of previous work and non-compliance with instructions in an invigilated or non-invigilated assessment item are all breaches of academic integrity and treated as academic misconduct. Examples of breaches of academic integrity include, but are not limited to:

- submitting work as your own for assessment that has been fully or partially completed by a third party, either paid or unpaid
- using output from artificial intelligence tools (e.g. ChatGPT) in whole or part without acknowledgement and/or without the approval of the Unit Convenor
- using another person's work or ideas as though it is your own work, without appropriate attribution
- working closely with another student or group of students (either past or current), to submit for assessment, some or all of the other student or students' work as your own work
- sharing without permission of the Unit Convenor, Swinburne resources or other material related to assessment to an entity or document repository site
- creating, intentionally modifying or inventing information that is intended to be submitted as part of an assessment item
- using the whole or part of a computer program written by another person as your own without appropriate acknowledgement
- poorly paraphrasing somebody else's work
- using a musical composition or audio, visual, graphic and photographic work created by another person without acknowledgment
- enabling others to cheat, including letting another student copy your work or by giving access to a draft or completed assignment
- letting someone or something else impersonate you, or you impersonate someone else in an invigilated or non-invigilated assessment item
- accessing, obtaining and/or providing to others unauthorised materials relating to an invigilated or non-invigilated assessment item.

The penalties for academic misconduct can be severe, ranging from a zero grade for an assessment task through to exclusion from Swinburne. For further details, see <https://www.swinburne.edu.au/student-login/academic-integrity/>

Student support

Swinburne offers a range of services and resources to help you complete your studies successfully, such as study and learning support and health and wellbeing services. Your Unit Convenor or studentHQ can provide information about the study support and other services available for Swinburne students. For further information, see the [Student support services](#) web page.

Special consideration

If your studies have been adversely affected due to serious and unavoidable circumstances outside of your control (e.g. severe illness or unavoidable obligation), you may be able to apply for special consideration (SPC).

Applications for Special Consideration are submitted via the SPC online tool normally no later than 5.00pm on the third working day after the submission/sitting date for the relevant assessment component. See <https://www.swinburne.edu.au/life-at-swinburne/student-support-services/special-consideration-assistance/>

Note: Submitting fraudulent (fake or altered) medical certificates is considered misconduct and can lead to serious penalties from Swinburne. In addition, your doctor may report fraudulent medical certificates as a prosecutable offence under the Victorian Crimes Act.

AccessAbility Services

If you are a student with a disability, medical or mental health condition or you have significant carer responsibilities, you may require reasonable adjustments to fully access and participate in education. Swinburne's AccessAbility Services can develop an Education Access Plan (EAP) that includes the services and reasonable adjustments that you need.

It is recommended that you register with AccessAbility Services when you first commence your course, but you can contact the service at any time during your studies to find out about reasonable adjustments. Contact [Accessability Services](#) to discuss further.

Once you have an approved EAP, you should contact the Unit Convenor as early as possible (e.g. beginning of semester) to discuss your adjustments so that we can better support your learning.

Review of marks

An independent marker reviews all fail grades for major assessment tasks. In addition, a review of assessment is undertaken if your final result is between 45 and 49 or within 2 marks of any grade threshold.

You can ask the Unit Convenor to check the result for an assessment item or your final result. Your request must be made in writing within 10 working days of receiving the result. The Unit Convenor can discuss the marking criteria with you and check the aggregate marks of assessment components to identify if an error has been made. This is known as local resolution. If you are dissatisfied with the outcome of the local resolution, you can lodge a formal complaint.

Feedback, complaints and suggestions

In the first instance, discuss any issues with your Unit Convenor. If your concerns are not resolved or you would prefer not to deal with your Unit Convenor, then you can complete a feedback form. See <https://www.swinburne.edu.au/corporate/feedback/>

Advocacy

If you require advice and support navigating University regulations, policies and procedures, or responding to academic progress, misconduct or assessment matters, you are advised to seek advice from an Advocacy Officer at the Swinburne Student Association. Talking to an Advocacy Officer is free, independent and confidential. For more information and booking an appointment, please see [Advocacy at the Swinburne Student Association](#)
